

# Project Eden and The future of securities settlement in a world of Digital Assets

## 5<sup>th</sup> ZKProof Workshop

# The financial ecosystem is changing

# DLT invades into traditional Stock Exchanges

# New ways of securities trading and settlement

Trading in  
Security  
tokens

DLT-based  
Depository

New forms of  
intermediation

Peer to peer  
trading

E-wallets  
instead of  
bank accounts

Payment in  
digital  
currencies

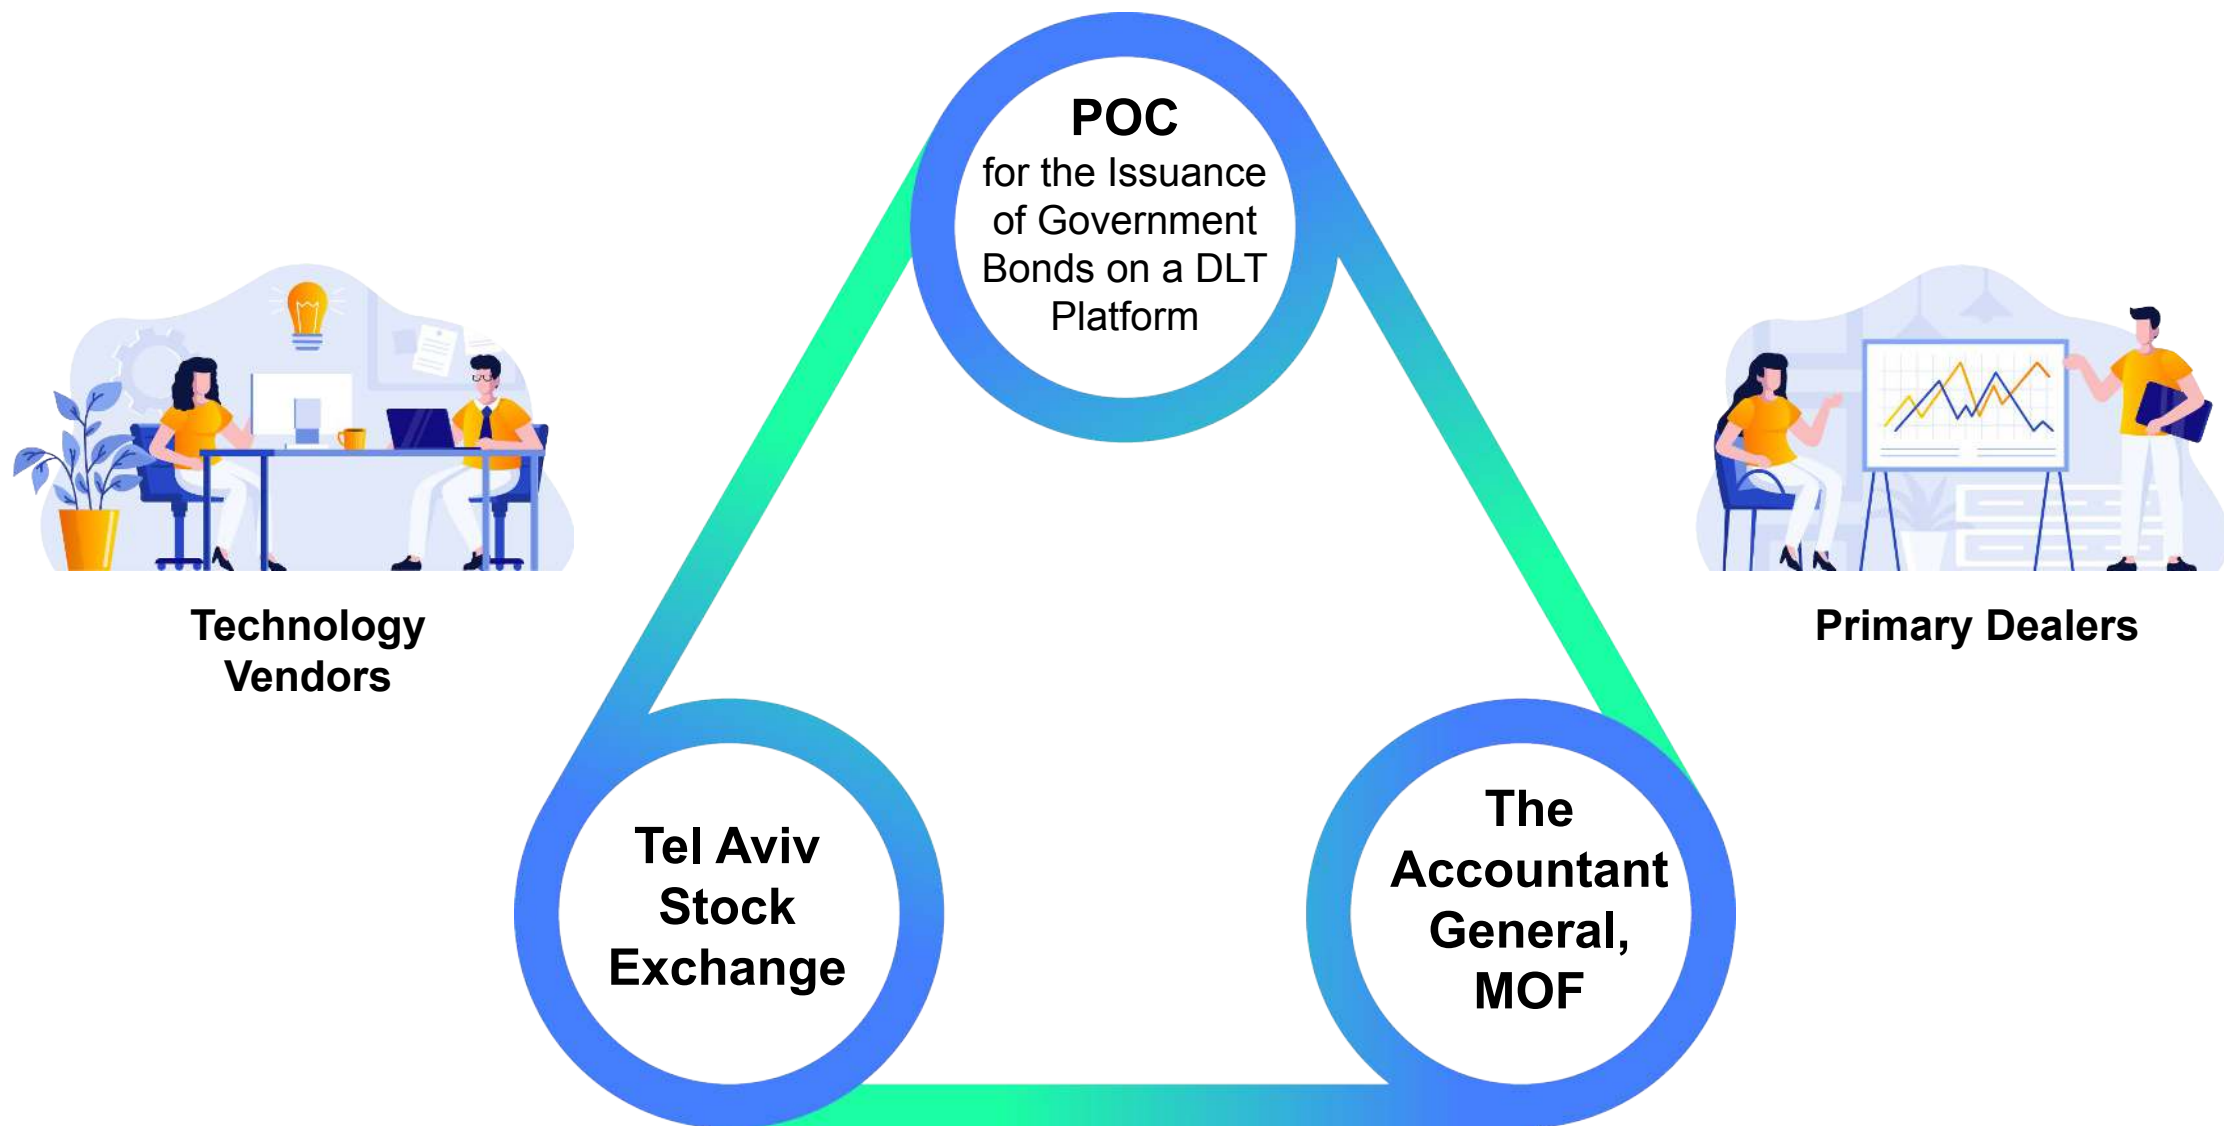

No need to  
obtain  
margins

Immediate  
settlement

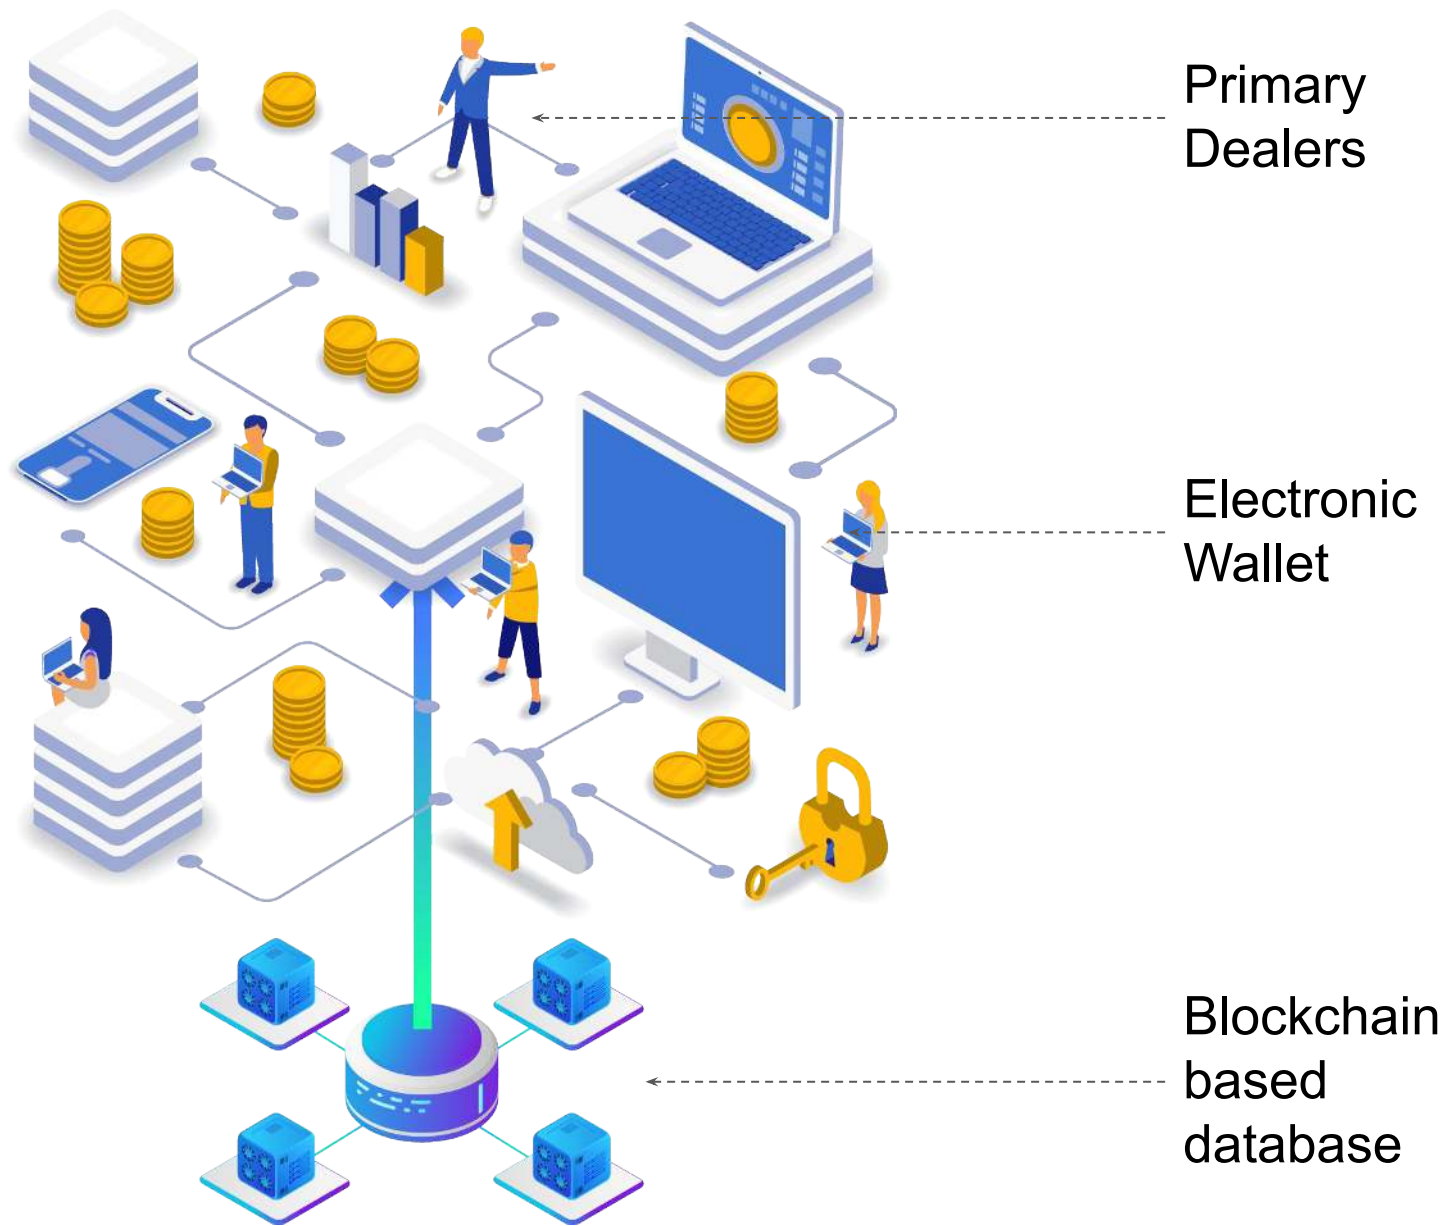

# Project Eden - a glimpse into the future

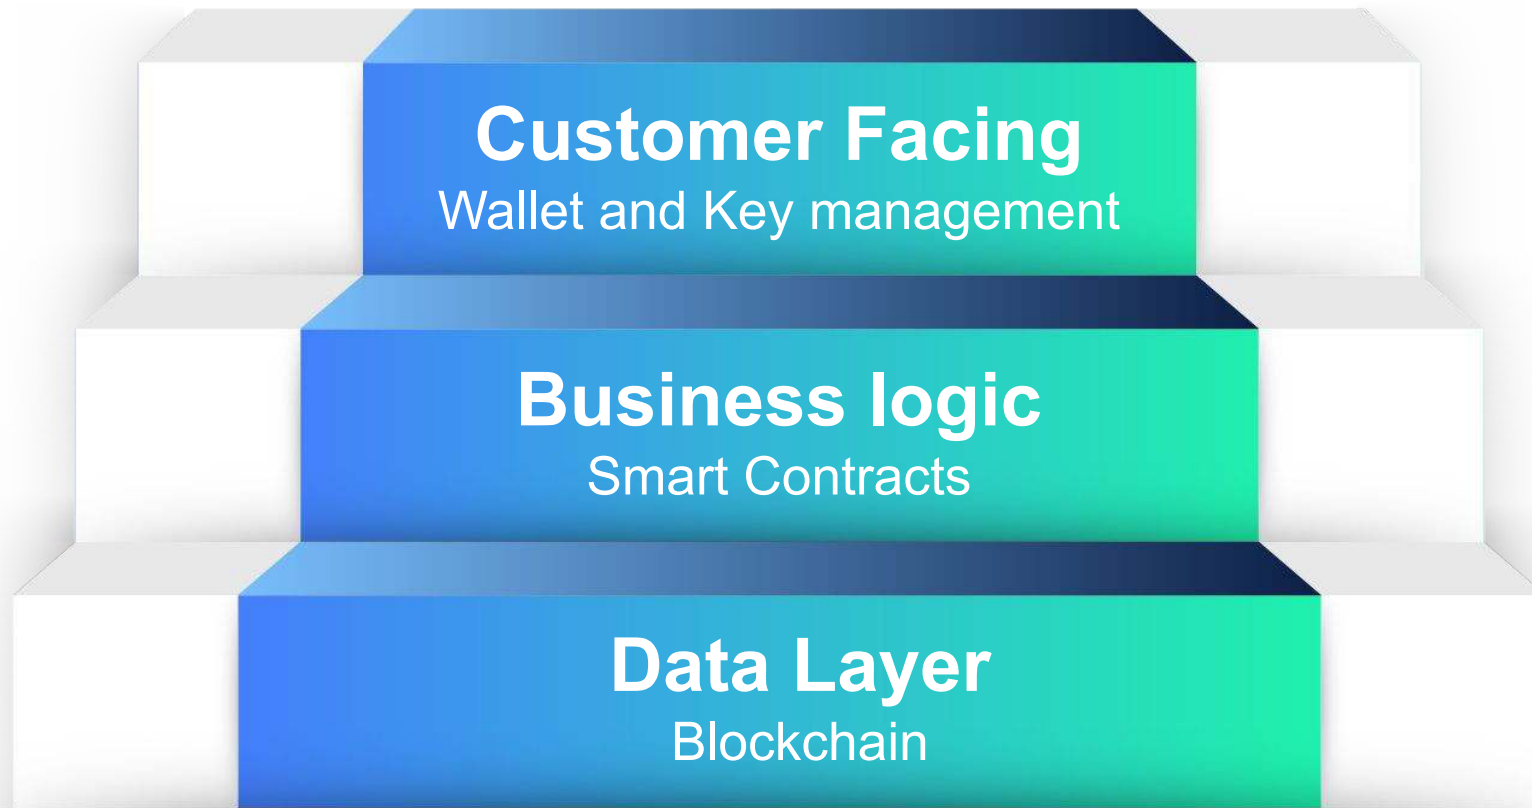

# Project Eden

## A glimpse into the future

# Project Eden

# Data Layer - Blockchain

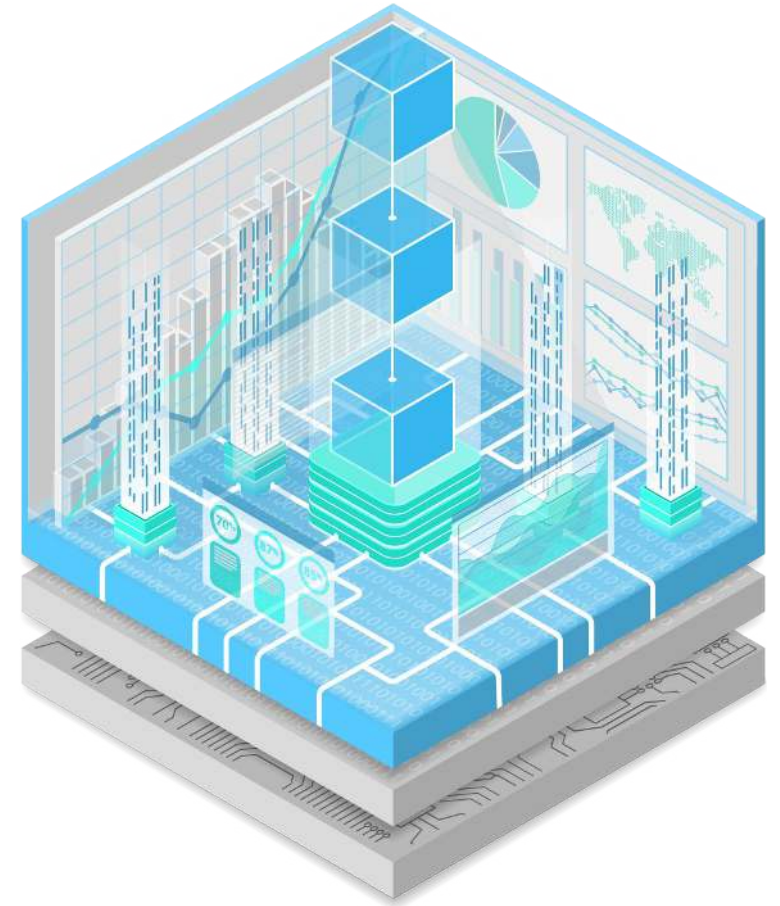

EVM Compatible

Immediate Finality

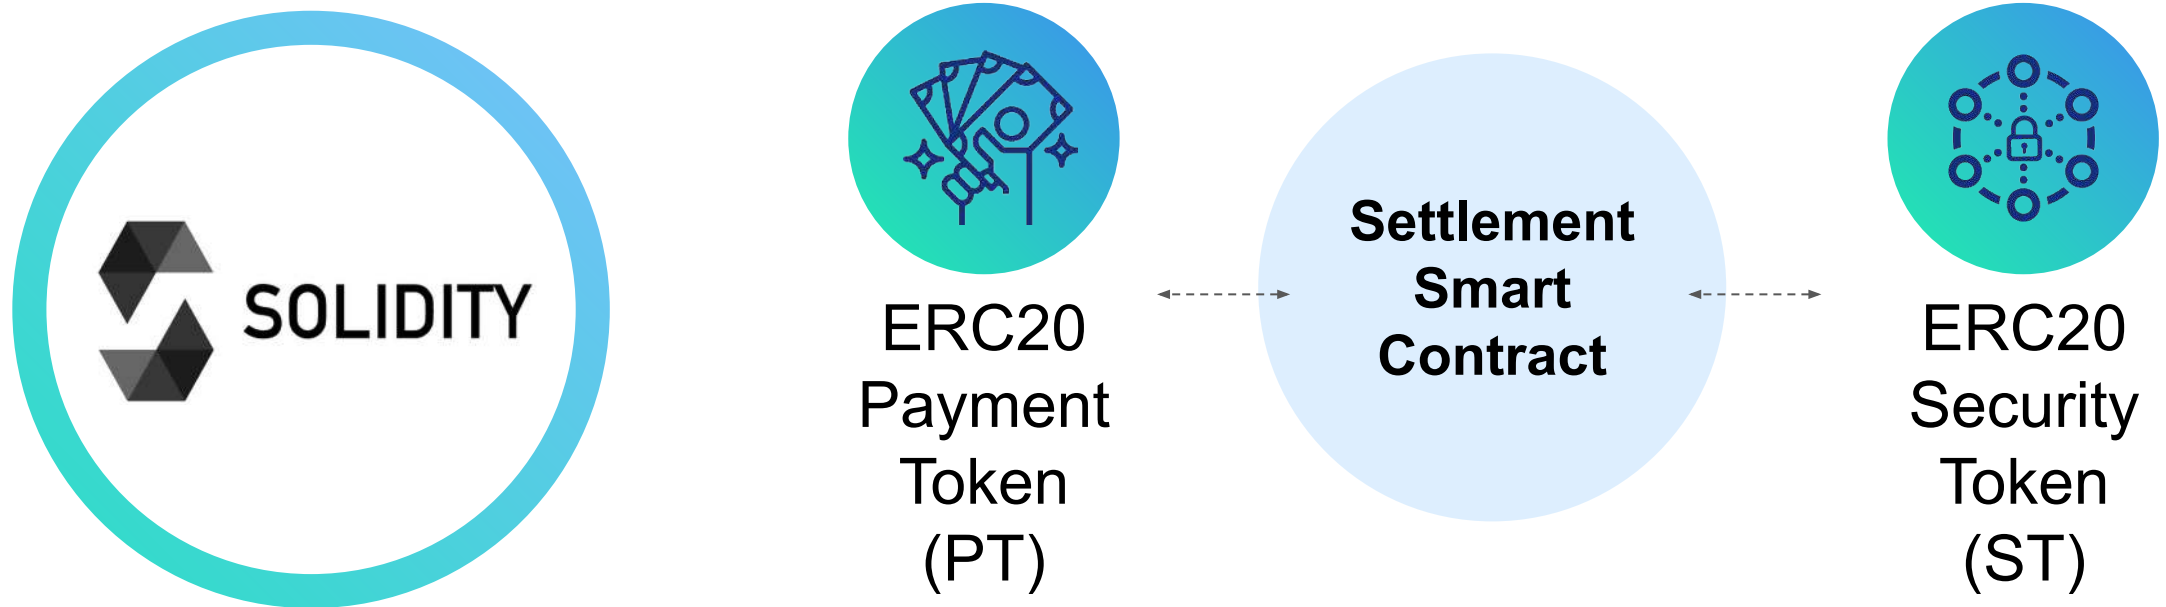

Enterprise Ready

On Prem  
Deployment

# Business logic – smart contracts

# Customer Facing - Wallet and Key management

EVM  
Compatible

World leading  
solution to secure  
private keys

Future option to connect to 1200  
institutions that already in the  
platform

Future options to add support for  
additional digital assets and crypto in  
the same platform

# Our Privacy Challenges

## Stock Tel Aviv Exchange

open to all the  
information in the chain

Can ZK  
Proof HELP  
US

(come talk with us)

## Customers

every customer see  
only what he needs

# Thanks
